-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "extending parallel outwards" is confusing; parallel seems to imply that the wing portions extend parallel to the support members, but "outward" seems to imply that they extend outwardly at an angle as disclosed. Please clarify the wording of the claims to reflect the disclosed invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Wendt.

Note mounting block 310 shown in Fig. 2, which corresponds to the claimed "base", side walls 320, 330 which read on the claimed "two support members", and note any of fins 322 readable on the claimed "wing portions". Note finally the recession formed in the base portion opposite the side on which the walls are located, defined by two ridges or protrusions. This portion defines a relatively thin area (along with the corresponding recessed portion on the other side).

Claims 3-5 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining references of record show various heat sink designs, either with or without heat pipes.
